

When the original 12 Day Pre-Primary Report was filed on 2/18/2010, a computer software error caused a batch of contributions to not be included in the report. As soon as the error was realized, the attempt was made to refile the report to correctly reflect total amounts of contributions received, beginning on 2/19/2010, but was not successful until 2/24/2010.
